

Conference against drought

in Luxembourg

Create and value a climate change resilient land

**Tuesday, 1st October 2024,
Luxembourg city.**

The president of the LuxAA will share the best worldwide practices of farmers, governments and villagers in fighting drought, desertification, but also floodings, for creating a resilient landscape, farm, garden and village.

With this knowledge, investors will learn how to turn an arid land into a successful investment, farmers will make their farms more resilient, eligible to water storage subsidies
This one day technical conference prepares for our Biodiversity fairs.

Attendees of the conference can also meet innovative luxembourgish start ups and service providers in agriculture, reforestation, biodiversity, innovative landscaping in the conference premises.

Anyone can become a member of the LuxAA and attend this conference
