

Conference against drought

in Luxembourg

Create a sponge city, resilient, rich in biodiversity

**Tuesday, 19th November 2024,
Luxembourg city.**

The president of the LuxAA an expert in urban planning, a renown specialist in urban biodiversity, as well as elected officials from various sponge cities around the globe will share the experience and best practices of the most famous sponge cities worldwide in terms of resilience against flooding, against heat, for

creating a biodiversity rich city with a high quality of resilient life for its citizens.

Officials, elected official, election candidates, real estate developpers, urban planners and association of users will find at this conference the most interesting know how, experience of those who built or transform cities into climate change resilient cities.

Attendees of the conference can also meet innovative luxembourgish start ups and service providers in city resilience&biodiversity in the conference premices.

Anyone can become a member of the LuxAA and attend this conference
