

Conference for Forestry

in Luxembourg

The international legal and technical aspects of forestry investments

**Tuesday, 10th December 2024,
Luxembourg city.**

At this conference, esteemed experts will present insights on the international legal and technical aspects of forestry investments. Various aspects of holding, improving, managing, tracking logs, complying with EUDR, planting a forest, even on sandy deserts with the use of new technologies to maximise growth rate and biodiversity, capturing biomethane will be explained.

The necessary compliance, financing, key legal and technical considerations necessary for successful forestry investments will be shared by experience professionals.

This technical day is designed to prepare you for the International Forest Investment Conference, to be held in partnership with DANA, in Luxembourg on March 25-27, 2025.
